## Guide for Household waste

### Biowaste

**Only biodegradable wastes:**

Biowaste is decomposing and compostable food and kitchen waste, also easily decomposed fibrous materials

**Attn!** Pack biowaste.

### Mixed Waste

**No hazardous waste, no waste electrician and electronic equipment**

Plastic products, dirty packages, dirty carton, ash, worn-out clothing and shoes

### Plastic Packages

**Remove caps and lids**

**Clean and dry plastic packages:** plastic containers, wrappers, bag or bottles used for packaging products to be sold

**Attn!** Plastic products, dirty packages and PVC are mixed waste.

### Glass

**Coloured and clear glass bottles and jars only**

**Attn!** Drinking-, mirror-, window glasses and porcelain are mixed waste.

### Carton

**Rinse dirty cartons and flatten them out**

Clean and dry carton/cardboard: packages, paper bags, toilet and paper towel rolls, milk and juice cartons.

**Attn!** Remember to flatten the packages.

### Paper

**All postal mail you receive:**

newspapers and magazines, adverts, brochures, envelopes, phone books and product catalogues, books (hardcover books with the covers removed), copy paper and printouts, white drawing and notepad paper and white paper bags

**NO wet or dirty paper**

### Metal

**Metal cans and small metal items:**

food cans and aluminium tins, empty paint buckets, steak pans etc.

Large batches of waste, cleaning loads, hazardous waste and electrical equipment are received sorted at the waste stations of the waste management service.

- **medicinal products** to pharmacies
- **batteries** to stores
- **other hazardous waste** to the collection container or Sortti station

HSY's Waste guide tells you what kind of waste your waste items are and where to take them, check the collection points:
